Anti-burglary

ANTI-BURGLARY ROLLER DOOR

# SAFELINE24

## EFFECTIVE, BUDGET-FRIENDLY ANTI-BURGLARY PROTECTION

Looking for effective, budget-friendly protection against burglary and theft? The **SAFELINE 24 (RC3)** anti-burglary roller door offers tested protection in accordance with the current DIN/TS standard for sensitive business areas, computer systems or security buildings, such as for the military, police and banks.

The door is suitable for both internal and external use. Available in dimensions up to seven by six metres, the **SAFELINE 24** anti-burglary door is the largest RC3 roller door on the market. The small room depth requirement is an advantage when it comes to installation and operation. With a permitted wind load up to class 4 or above, the roller door is suitable for regions with especially high wind loading.

The door leaf is made up of double-walled aluminium slats with a multilayered ISO core. An anti-burglary guide rail that is closed on three sides provides anti-tamper protection all round. This ensures that your business unit is protected effectively and reliably by a burglar-proof roller shutter. Various optional extras are available on request.

### Benefits at a glance

- ✓ RC3 anti-burglary protection rating
- ✓ Guide rail with anti-tamper protection all round
- ✓ Suitable for external and internal use
- ✓ Permitted wind load up to class 4 or above
- ✓ Clear width and height tested and certified up to 7,000 x 6,000 mm
- ✓ Small room depth requirement for installation and operation
- ✓ Option with frequency converter drive for material-friendly soft start and soft stop of door system available
- ✓ Self-opening and closing electromechanical locking mechanism with/without VdS-C contacts available as optional extra

### Resistance Class RC3

3

Our products with an RC3 rating offer optimum protection against experienced burglars. Tested in accordance with the DIN T/S 18194:2020-07 European standard, they will withstand break-in attempts with tools such as a second screwdriver and a crowbar for a total attack time of 20 minutes and a static load of up to 600 kg.

A door in resistance class RC3 offers you reliable protection against vandalism and theft, safeguards your property and provides reliable personal security.
